allows for the viewing of drawings on the Internet, which is unavailable in AutoCAD due to licensing issues. AutoCAD LT does not have any interface to Autodesk Exchange apps. AutoCAD LT's roots can be traced back to the earliest versions of AutoCAD, which were available in "unsupported" formats, without any programming interface. Third-party software A third-party toolset has been built around AutoCAD and AutoLISP. The Open Source OpenAutoCAD project, supports over 9000, (pre-release) files from over a dozen CAD and DICOM applications, including Autodesk, Microstation, Mentor and Vectorworks. OpenAutoCAD also supports running the applications natively on a supported platform. OpenAutoCAD is an open source project based on the open source Visual LISP (VLL) programming language. Application links Applications link (AutoCAD, Online Link) is a utility for registering AutoCAD documents, files, or URLs with a link service.
